## Claim Rejections - 35 USC § 102

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-2 and 4-6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by EP 0395300 or Rigby et al.

See the appropriate paragraph of the 8/4/04 Office action.

Claims 1-2,4-6 and 8-10 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Aurenius.

See the appropriate paragraph of the 8/4/04 Office action.

Claims 1-2,4-6 and 8-10 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by GB 2306484 or WO 97/12680.

See the appropriate paragraph of the 8/4/04 Office action.

## Response to Arguments

Applicant's arguments filed 11/4/04 have been fully considered but they are not persuasive.

Applicants' amendments and remarks were convincing to overcome the 35 USC 112 second paragraph rejections.

Applicants' traverse the rejections over EP'300, Rigby and Aurenius on the grounds they do not teach the largest external dimension as less than 100 microns. EP'300 teaches in example 3, Rigby on page 3 and Aurenius in the abstract layers having dimensions of less than 100 microns which meets the pending claims. The Office has read the instant claim language "... the largest external dimension of the

support being less than 100 microns..." as only claiming a support or layer within the device having the dimension of less than 100 microns, not the entire device have a dimension of less than 100 microns. Even if the claims were amended to clearly specify the device is less than 100 microns, there is well settled case law that states it is within the skill of the art to miniaturize a device. The Office would use this law and change the rejection from a 35 USC 102 to a 35 USC 103 upon further appeal.

Applicants argue GB'484 and WO 97/12680 fail to teach the claimed anodized layer. Both of these references teach an aluminum layer which has been read on the claimed anodized layer because pending claim 4 further defines the claimed anodized layer as aluminum.

## Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
